

Kalpak Gajanan Korde

Product Management | Mechanical Engineering | AI Products
kalpakkorde38@gmail.com | +91 9130652073 | Amravati, Maharashtra | [LinkedIn](#) | [Portfolio](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Innovative Mechanical Engineer and Masai PM Program graduate (IIT Patna) skilled in PRDs, Agile, Figma, and agentic AI workflows. Patent holder with hands-on experience building AI products, leading teams, and shipping prototypes. Seeking APM roles where engineering depth meets user-focused product thinking.

EDUCATION

Vishlesan i-Hub, IIT Patna — Product Management & Agentic AI 08/2024 – 03/2025
Government College of Engineering, Amravati — B.Tech, Mechanical Engineering 08/2022 – 07/2025
CGPA: 6.66

PRODUCT MANAGEMENT SKILLS

Product Tools: Figma, Miro, Jira, Confluence, Mixpanel, Google Analytics, n8n
Product Execution: User stories, backlog management, wireframing, A/B testing, PRD writing, sprint planning
Strategy & Research: User research, competitor analysis, market research, roadmapping, RICE/MoSCoW prioritization
Engineering: SolidWorks, Fusion 360, CATIA, 3D Printing, Robotics, Mechatronics

SOFT SKILLS

Stakeholder Communication, Problem-Solving, Analytical Thinking, Cross-functional Teamwork, Leadership

PROJECTS

RECRUIT-AI — AI RESUME SCREENING ASSISTANT | n8n | LLMs | Figma

Masai School PM Capstone | IIT Patna Partnership | 2024–25 | [View Project](#)

- Analyzed recruiter workflows; identified manual screening consuming 50% of recruiter time as core bottleneck
- Defined persona (SME recruiter), wrote PRD, and applied Jobs-to-Be-Done framework through structured user research
- Built working agentic AI backend using n8n — automated resume parsing, LLM-based ATS scoring, and decision emails
- Validated prototype targeting 60% screening time reduction and 3x faster time-to-hire for SME tech companies

SAVESMART — AI BUDGETING & EMERGENCY RECOVERY APP | React | Capacitor | Figma

Personal Finance Product | React Mobile App | github.com/kalpuexe/savesmart | [View Project](#)

- Identified gap in budgeting apps — no tool auto-adjusts future discretionary spending after emergencies to protect savings goals
- Conducted competitor analysis across YNAB, Mint, Monarch, Walnut, and INDMoney; defined unique 'goal-protection' positioning
- Designed and built React mobile app with AI-powered reprioritization engine — automatically reallocates 'wants' spending post-emergency
- Delivered working APK prototype addressing ₹5,000+ emergency scenarios; targets India's outcome-based budgeting market opportunity

AGV FOR CROP FERTILIZATION — PATENT HOLDER | SolidWorks | Arduino

Design Patent No. 436182-001 | Patent Office, Govt. of India | Dec 2024 | [View Patent](#)

- Identified farmer over-fertilization problem; applied MoSCoW prioritization to define MVP feature set
- Secured Design Patent granted by Government of India — externally validated by Intellectual Property India

PROFESSIONAL EXPERIENCE

Freelance CAD Designer & Technical Consultant

08/2023 – Present

Self-Employed | Remote

- Delivered end-to-end CAD designs for 5+ clients; translated ambiguous briefs into precise technical specifications
- Generated ₹16,000+ revenue by independently managing client communication, feedback cycles, and delivery timelines

Robotics Instructor — Gurukul Fellow

05/2024

Gramgeeta Mission | Teosa, Amravati

- Designed and delivered robotics curriculum for underprivileged students with zero prior technical background
- Demonstrated leadership by simplifying complex engineering concepts for diverse learners with no prior exposure

CERTIFICATIONS & ACHIEVEMENTS

Design Patent — Patent Office, Govt. of India (Dec 2024) [View Certificate](#)
i2i Stage 2 Selection — Eaton India Foundation + COEP (2024) [View Certificate](#)
DD-Robocon 2023 — IIT Delhi + Prasar Bharati (June 2023) [View Certificate](#)
Gurukul Fellowship — Gramgeeta Mission, Amravati (May 2024) [View Certificate](#)
